Next day payment service

Overview

PayPort has secured a number of flexible funding facilities which eliminates the cash-flow gap between customers and suppliers.

Next Day Payment Service

PayPort offers some of the most competitive routes through the integration of its state of the art routing/billing engine and its automated 'next day' payment platform.

Suppliers get paid 'daily' for yesterday's traffic while customers pay on standard post paid terms.

Eliminating the cash-flow gap between customers and suppliers around the globe

Next day payment service

In detail

Step 1

PayPort is connected to a number of Tier 1 and Tier 2 carriers.

PayPort aggregates voice traffic from these carriers and sends to niche and tested suppliers for termination.

These carriers will pay their PayPort invoices based on agreed post-paid terms with PayPort.

Step 2

Using its flexible funding facility PayPort makes daily payments to suppliers regardless of the customers' payment terms to PayPort.

A bespoke solution designed with flexible funding partners

03

Real-time settlement project

Overview

PayPort is integrating its billing platform with its proprietary Blockchain and smart contract payment platform to become the first provider in its industry to offer a real-time settlement solution to its supplier base.

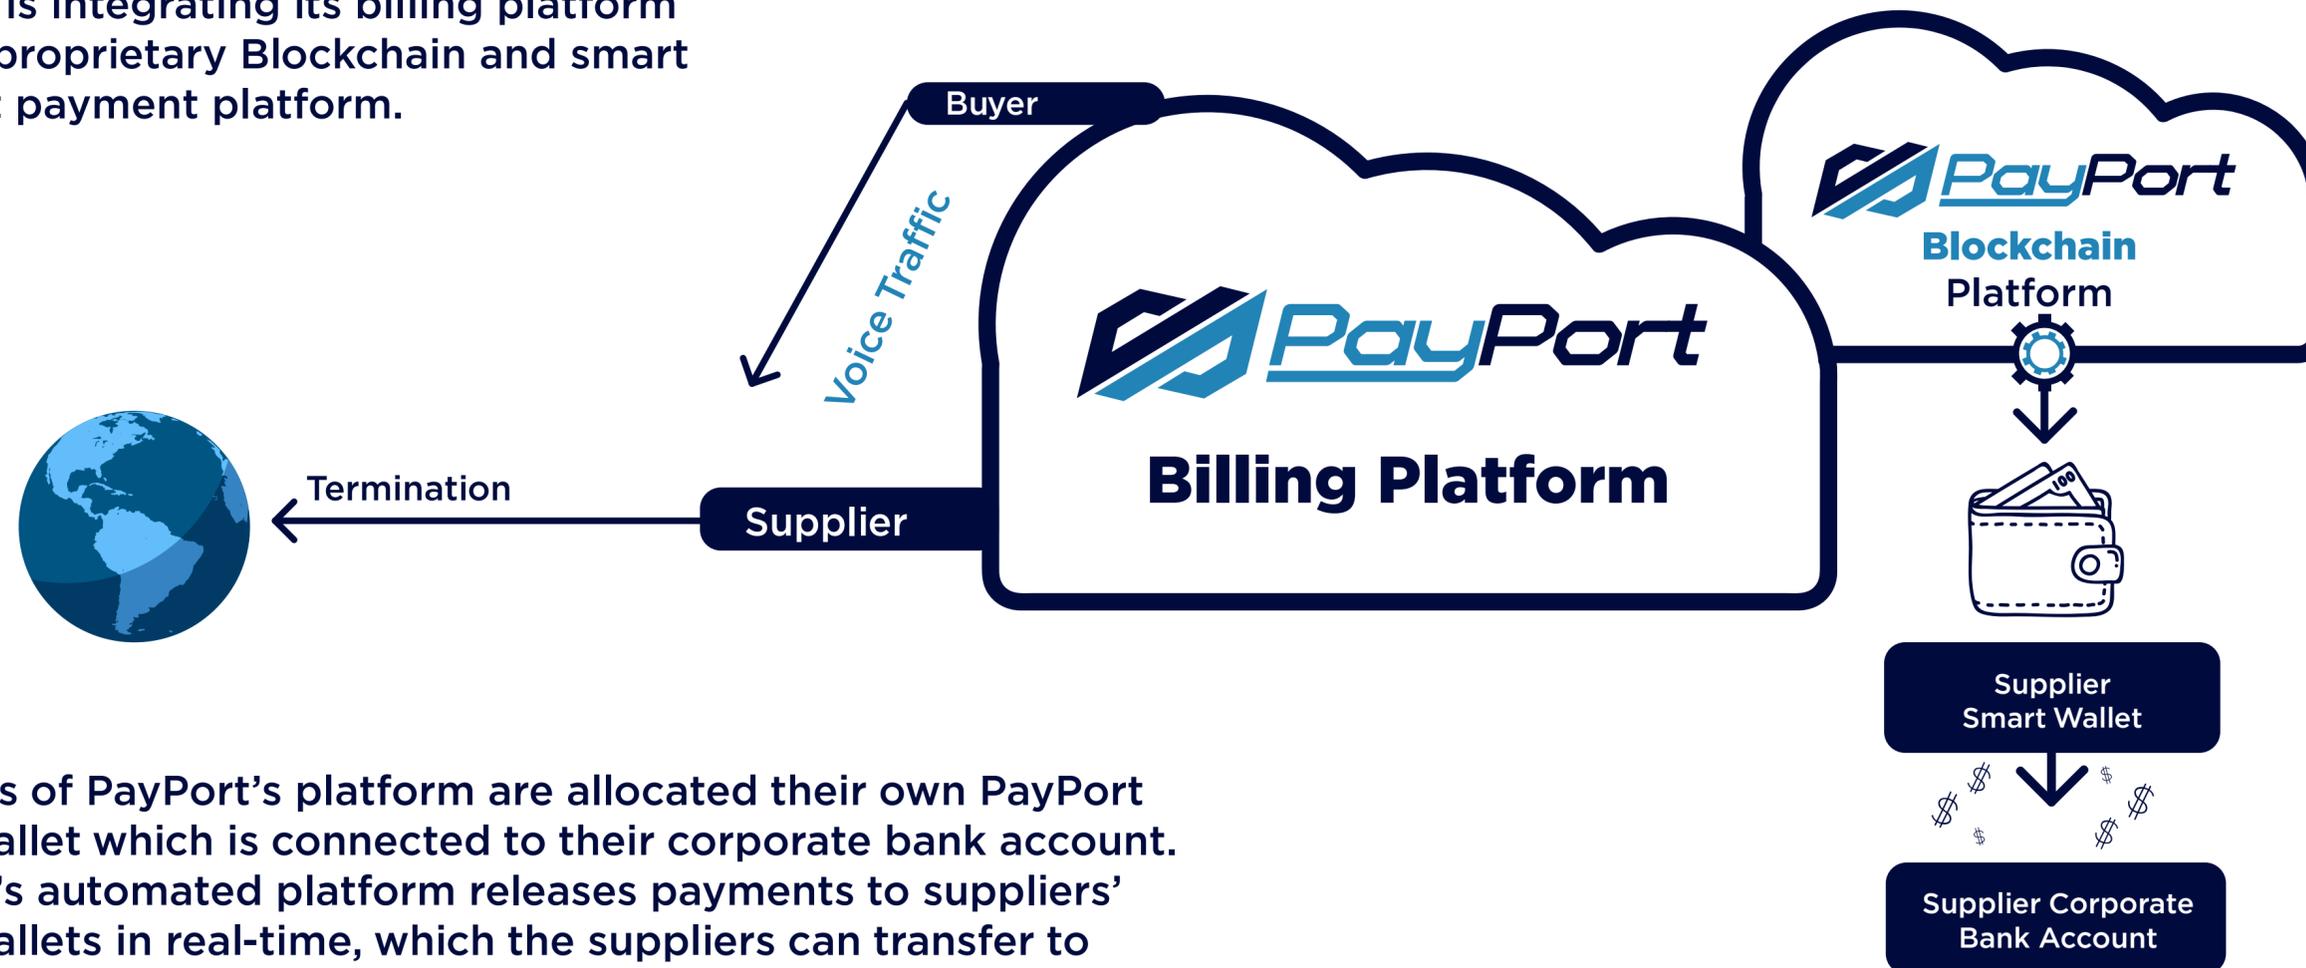

Proprietary Blockchain/Smart contract technology offering the first real-time settlement solution in the industry

Real-time settlement project

In detail

PayPort is integrating its billing platform with its proprietary Blockchain and smart contract payment platform.

Members of PayPort's platform are allocated their own PayPort smart wallet which is connected to their corporate bank account. PayPort's automated platform releases payments to suppliers' smart wallets in real-time, which the suppliers can transfer to their bank account at a touch of a button.
